

Delta Development Group, Inc.

Continuity of Operations (COOP)

Delta brings the expertise of its Disaster Preparedness Solutions (DPS) team to help government organizations maintain operations during a disaster or public health emergency. The Delta team has extensive experience preparing for all phases of disasters.

Elements of a Comprehensive COOP Plan

Planning Process

Early in the project, the Delta team works to gather information and better understand the unique needs of your organization. Delta recognizes the importance of ensuring the plan is scalable and flexible to meet the needs of the situation whether it is structural damage to your facility necessitating relocation or a pandemic resulting in employees needing to work from home.

Each organization has specific essential functions and priorities and the Delta team focuses the planning process on issue identification and problem solving to provide a tailored plan.

The Delta Difference

Delta offers a team of diverse, highly skilled experts. We will listen to the needs of your organization and apply best practices consistent with federal and industry recommendations. The professionals who make up Delta's DPS team specialize in the development and implementation of plans that address complex all-hazard scenarios.

We would be pleased to discuss COOP.
