I N C .

HIGH CONSEQUENCE INFECTIOUS DISEASES

Plans

The Delta team has designed multiple plans addressing High Consequence Infectious Diseases (HCID) both in general and for specific HCIDs such as Ebola Virus Disease (EVD) and pandemic influenza. These plans include medical material management and distribution, points of dispensing, medical surge, epidemiological investigation, laboratory testing, information sharing, alternate care sites, scarce resource, disaster mental health, and incident management.

Training

The Delta team has developed customized training packages for in-person delivery as well as on-line distributed learning.

Exercises

The Delta team has extensive experience in planning, delivery, and evaluation of workshops, seminars, tabletop (TTX), functional (FE), and full-scale exercises (FSE). The Delta team is skilled at applying the Homeland Security Exercise and Evaluation Program guidelines in a manner that supports our clients needs and challenges them at the same time. Examples of exercises include:

- Pandemic Influenza TTX for Business and Industry
- Social Distancing Law TTX
- Ebola No-Notice Drills
- Ebola TTX
- Zika TTX
- Pandemic Influenza TTX
- Receipt, Stage, Store FSE
- Points of Dispensing FSE
- Medical Surge Workshop TTX
- Laboratory and Epidemiology Coordination TTX
- Alternate Care Site TTX
