The Functional Needs Registry helps state and local governments identify and assist individuals with functional/special needs during an evacuation. It is an efficient way to catalog individuals and their needs, map the evacuation area, and deploy the essential resources.

WHAT YOU'LL GET

FEATURES/BENEFITS

- Online, voluntary registry tool
- Designed with input from first responders and special needs community
- Multitiered administrator access (e.g., state, regional, county, municipal)
- Designed to address HIPAA concerns
- A proven product that can be rapidly implemented, combined with a dynamic training model
- Perpetual license with unlimited user access
- Simplified design to promote user self-registration to support preparedness activities
- Third-party data integration and reporting capabilities

HELP

MAINTENANCE AND SUPPORT PACKAGES AVAILABLE

- 24/7 support
- Service pack updates

MARKETING

PROVEN SOCIAL MARKETING STRATEGIES

- Customized social marketing strategy designed to support the registry
- Reflects demographic profile in local/regional media markets
- Engages trusted community advocates in public, private, and nonprofit sectors as message portals
- Unifies message to streamline efficiencies in registry participation

Client Testimonial

“Total Visibility has really improved our local processes for collecting and maintaining data for functional needs support services. The system decreases the number of staff hours needed to keep the data updated not only for FNSS purposes, but for facility data as well. Total Visibility also allows us to give our city jurisdictions improved awareness of functional support service needs and greater control and access to their data. Working with Delta Development on this project has been a wonderful experience and we look forward to a long and productive relationship with them.”

David W. Olinger

PHEP Coordinator, Fort Bend County HHS

(Client Testimonial continued)

“Delta’s support to Monmouth County during our implementation of the Special Needs Registry was paramount to the success that we have had thus far.”

Michael Oppegard

Deputy Director, Monmouth County

“The County of Rockland, New York is currently using the Special Needs Registry. We are very pleased with this invaluable system because it is one central source of vital information for emergency first responders. This system has eliminated many hours of data entry, antiquated data-sharing of vital information, as well as numerous phone calls. We no longer need to reach out to residents each year for updates due to the automated update requests that the database generates. This ensures the information maintained is accurate and current. It is extremely helpful that residents and their family members can maintain their own information.

We now have many local special-needs agencies entering and maintaining their own facilities. This identifies where group homes and assisted living residences are located within our community.

Rockland County continues training of staff in various agencies to increase awareness and usage of the database. In the event of any emergency, large or small, this system will be a great tool in getting assistance to those who are most vulnerable in our community.”

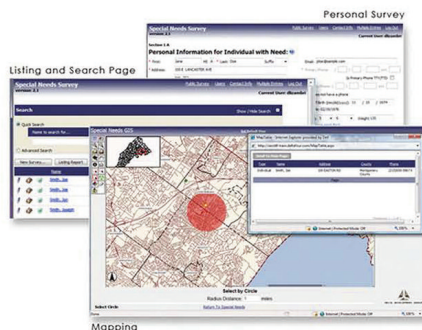

Jennifer Barrett

Rockland County Fire and Emergency Services

“The Oswego County Health Department has successfully implemented the online Total Visibility Functional Needs Registry for the County. The Registry allows individuals the opportunity to voluntarily provide information that will help emergency response agencies assist those individuals that may need help during a disaster or other emergency. It is a critical component of the County’s overall preparedness plan. We strive to educate the community about the importance of being prepared, and participation in the Registry puts them one step closer to ensuring their safety.”

Anna McNamara, Public Health Educator

Emergency Preparedness Coordinator, Oswego County Health Department
